CAVE INDEX

VOLUMES 1 – 42

1982 - 2023

Includes Hat Creek Cave List (p. 40)

Shasta Area Grotto, NSS

NOTES:

Volume and Issue numbers are in *italics*.

Trip reports and other detailed cave descriptions are identified by page numbers in **dark-teal bold type**: be aware that only the initial page of a report is referenced, although the report itself may run to 2 or more pages.

Citations not in dark-teal bold type are brief notices, typically of visits, cave surveys, or bat counts, where little is said about the cave.

Caves in which bats have been reported are identified by asterisks (*).

The Index largely omits cave mentions in meeting minutes and future trip plans, and mentions that include no details beyond the cave name. The Index also largely omits cave names in articles reprinted from other grotto newsletters, newspapers, and other sources. [For the most part, reprints are copied as jpegs (pictures) rather than text, and are not searchable.]

Where cave names have changed over time: the name in current use is inserted in braces [] in the PDF version of each original article. In the Index, the older name is cross-referenced to the current name, and citations are listed under the current name only.

All page numbers shown in the **Index** are for the digital (PDF) version of the SAG RAGs. Page numbers will occasionally differ slightly in the original (printed) issues.

The index lists United States caves first, followed by caves in other countries (p. 34) and Bill Broeckel's list of Hat Creek Area caves (p. 40).
